

As our country continues to feel the impact of Coronavirus (COVID-19), we at Ring Precision want to connect directly with you to share the steps we are taking to ensure that our customers, associates, employees and the communities we live in, remain safe and healthy.

The health and wellness of our employees and customers is our top priority, and we are monitoring the situation closely. We have developed action and response protocols at our facility to maintain a safe environment. We are following the guidance from the Centers for Disease Control (CDC) and other public health organizations. Many of you have asked about our ability to continue to provide you with the needed tooling and manufacturing services that you need to run your business. We are currently remaining open to process all of our orders as we have promised product to our customers. If this should change due to local health department direction, we will inform our customers immediately and try the best we can to continue to run on a reduced workforce.

Our Manufacturing facility is currently open 24/6 and can expand production on an as-needed bases. Additionally, I have ordered extra steel and raw materials to ensure we have ample supplies should we see interruptions in our supply chain.

We thank you for your business and wish all well through this tumultuous time in history!

Best Regards;

*Dale R Gier*
